

KLOOFSUITS

FREE BASIC BALACLAVA TEMPLATE

This pattern is intended for use with a stretch fabric, such as lycra, and is designed to fit most head sizes. Feel free to tailor or customise as you wish.

When making these for fursuit lining, I do not cut the eye holes as I do this once the base is built over the top. If you do cut the eye holes, please secure the edges so they don't fray, such as with an overlocker or zig-zag stitch.

Download and Print this document, cut the pieces out and tape them together, matching up the corresponding lines. The dotted line represents a 5mm seam allowance, should you wish to include this. You'll need to cut two of these - one flipped.

This template is free to use for both commercial and personal use, as long as Kloofsuits is credited as the creator in any use.
